

Agenda 11/30

MVP Feedback Questions

- What were the actual expectations of the MVP?
- Robustness vs Features?
 - We opted for adding more things than for making the things we already implemented robust since we were planning on doing that for the final.
- Attendees and Registration
 - We decided that it would be better for attendees to not need to be logged in
- Event.js - Concerns about division/ modularizing of the file (+ object.freeze?)
- './event' - Concerns about modularizing this
- "idiot-proof" vs. "restricting"
- comments on model methods (how granular? eg. get methods)

New UI Demo

- Landing Page is pretty
- Using modals now
- Registration > Login state

Current Progress Report

- Talk about our other doc

What is expected on Thursday

- What we are planning on doing
- What do we actually need?
