Progress Report

Events

- Your Events Page
  - List of all your events
  - Can delete/add events
  - Adding events:
    - specify name, start date/time, and end date/time
- Todos Page
  - List of all your todos for an event
    - organized by category
  - Event panel with current information for event
    - Can edit event through this panel
    - Can add costs
    - Can access invite link

Attendees

- RSVP page
  - link can be accessed through the event panel by the event organizer
  - or through the events feed after selecting the "Attend" option

User Accounts

- Using Passport.js for accounts management
  - Currently implementing a local strategy
  - Still need to do verification of inputs (an email is actually an email)
    - validation of format

Routing

- Middleware in place to make sure that users are authenticated with Passport.js
- Routes in place to update event information as well as attendees status

Database

- User, Event models almost complete (and complete re. MVP)
- Plan to add edit methods for most of the data, convenience methods as requested by teammates
